The Bendix®BA-921 compressor in the C7/C9 air induction system (see Figure 10) receives its air from the engine's intake manifold (turbocharged). During the pumping condition (loaded mode), the air flows from the engine intake manifold through the inlet check valve and inlet line to the compressor inlet port.

SD-01-690 - Bendix

C7 Industrial Engine Operation and Maintenance Manual – Turbocharger – Inspect Periodic inspection and cleaning are recommended for the turbocharger compressor housing (inlet side). Any fumes from the crankcase are filtered through the air inlet system.
