11 Motion Section 3

Chapter 11 Motion

Section 3 Acceleration

Acceleration: the rate at
which velocity changes.

Scientifically,

Acceleration is

described as changes in
speed, changes in

Read PDF

Chapter 11

direction, or changes in both. Acceleration is a vector. An example of acceleration due to change in speed is free fall will discuss later.

BALANCED FORCES

Read PDF

Chapter 11

Balanced forces produce a net force of zero.

Therefore, an object experiencing balanced forces will not change its motion. This means that an object at rest will remain at rest if the forces are balanced. An object in motion will remain in motion if the forces are balanced.
