Any chemically

which is used to
cure, treat, prevent
or diagnose any
disease in humans
or animals as well
is known as drugs.

If a chemically
created agent

promotes physical and mental well being, then that can also be classified as a drug or a pharmaceutical agent. Basically, they alter the physiology of the host ' s body.

In pharmacology,
the term mechanism
of action (MOA)

refers to the
specific biochemical
interaction through
which a drug

substance produces
its pharmacological
effect. A

mechanism of
action usually
includes mention of

the specific

molecular targets to which the drug binds, such as an enzyme or receptor.

living organism,
produces a
biological effect. A
pharmaceutical
drug, also called a
medication or
medicine, is a
chemical substance
used to treat, cure,
prevent, or
