"Earth Explored" brings you some more information and supporting activities from the Learning Team. Discover what lies at Earth's deepest ocean and encounter trees as tall as 8 double-decker buses!

Earth Science in Edinburgh | Earth Explored | Dynamic Earth

The Earth's crust is composed of continental plates that are in constant motion because of the convection currents in the Earth's mantle and outer core. It is this movement that causes earthquakes and volcanoes. What types of landforms are created at divergent plate boundaries? Divergent boundaries cause mid oceanic ridges.
