Engineering Graphics And
Design Curriculum

Engineering drawings are a universal language for engineers globally. It is very important to know how to read and create drawings. In this course you will start with a classic 2D drawing approach to learn the basics and then progress to a workflow using cloud collaboration technology and advanced 2D to 3D workflows. Go beyond 2D and 3D

students proceeding to studies in Applied Science/Engineering. This is a project-based course focusing on design and design-analysis. Students will learn the role of technical drawing in project design and produce two-dimensional and three-dimensional technical drawings. This course replaces APSC 1110.

Graphic Design Curriculum Guide

This curriculum is intended for students pursuing a career in the graphic design profession. This graphic design curriculum gives students the opportunity to learn the skills and knowledge required to function within the graphic design industry. Students use industry standard software and traditional media to visually express their ideas.
