The domestic market engine was the 933 cc straight-4 side-valve engine familiar to drivers of predecessor
models since 1933. The 1172 cc straight-4 engine from the Ford Ten was fitted for some export markets,
including North America, where imports began for model year 1948; these cars used the slightly more
aerodynamic "three-hole" grille from the 1937-8 Ford Ten 7W, prefacing the 1949 E494A ...

Ford (europe) - Ford Anglia E04A (1939-1948)

The Ford Sidevalve is a side valve (flathead engine) from the British arm of the Ford Motor Company, often
also referred to as the "English Sidevalve". The engine had its origins in the 1930s Ford Model Y, and were
made in two sizes, 933 cc (56.9 cu in) or "8 HP", and 1,172 cc (71.5 cu in) or "10 HP". The early engines did
not have a water pump as standard, instead relying on thermosiphon ...

Ford Sidevalve engine - Wikipedia

The Mercury Eight is an automobile that was marketed by the Mercury division of Ford between 1939 and
1951. The debut model line of the Mercury division, Ford slotted the full-size Mercury Eight between the
Ford Deluxe (later Custom) model lines and the Lincoln. In total, Ford assembled three generations of the
Eight (before and after World War II).

Mercury Eight - Wikipedia

The Ford flathead V8 (often called simply the Ford flathead, flathead Ford, or flatty when the context is
implicit, such as in hot-rodding) is a V8 engine with a flat cylinder head designed by the Ford Motor

However, in March 1939 the government, anticipating war, introduced restrictions whereby Ford were permitted to produce only a single standardised engine in the class of cars covered by engine sizes between 1.2 and 2.0 litres, and so the Taunus used the smaller 1,172 cc engine (a k a known as English Sidevalve) carried over from the Eifel model.

Ford Taunus G93A - Wikipedia

The standard Ford inherited the grille of the 1939 model with blackout on each side of a heavy chrome center; heavier headlight surrounds serve as another major differentiator from the 1939. 1940 was the last year of the 1937 design and its smaller V8 engine, with a straight-six engine to be reintroduced the following year.

1940 Ford Pickup Truck ~ V8 engine - AutoMall Online

Ford came out with the small V8 in 1937 to provide a more fuel efficient and less expensive option to the regular 85hp equipped cars and light commercial vehicles. These engines were obvious by their small size and the 17 Stud heads. Ford also built the 60hp engine for the European market with some modifications. [...]

Ford of Britain - Wikipedia

In early 1939, Ford redesigned the Transit Bus as a rear-engine model, to improve performance through better weight distribution. At the same time, the redesign used a new, larger V-8 engine: a 95 hp, 239-cubic-inch model. A prototype bus was built in February 1939, and series production began in October 1939 (in the 1940 model year).
