As a rough average, land costs for industrial plants amount to 4 to 8 percent of the. These design guideline are believed to be as accurate as possible, but are very general and not for specific design cases. They were designed for engineers to do preliminary designs and process specification sheets.

### Plant Cost Estimating Engineering

Once individual equipment costs are known from either manufacturers ' price quotations or estimating charts as discussed in the previous chapter, they can be utilized to form preliminary total plant cost estimates. A suggested sequence for obtaining such estimates
