Ocean Safety Ltd - Bilge alarms

Many regulations now call for a bilge level alarm system to be fitted. Alternatively, a simple float switch and buzzer / light will provide a similar warning. Bilge water level alarms activate when the bilge water is detected at a specified level. An audible and visual alert is then produced to inform that the bilge water requires pumping out.

Johnson Pump Marine | SPX FLOW: Global Industrial ...

The better high water alarm systems works on a normally closed circuit, if bilge water level rises the sensor/float switch opens the circuit and triggers the alarm. The benefit of this system is if a sensor wire breaks the alarm goes off to warn you of the problem, plus the test button on the Johnson and others like it, only test the buzzer and light, nothing else.
