Learn Enough Command Line to Be Dangerous
The batch command ECHO is used for echoing commands on/off and printing message to the console. Example. @echo OFF echo Hello. Output. Hello. This command ECHO displays Hello in the console as shown above. Besides printing message, echo is also used for deciding whether or not to display the command itself. Like in this example as well, in the first line we have turned OFF echo, which makes sure that commands themselves are not printed.

Batch File Commands (A-Z) │ Explanation and Examples

Normally, the first line in a batch file often consists of the following command. ECHO Command @echo off By default, a batch file will display its command as it runs. The purpose of this first command is to turn off this display. The command "echo off" turns off the display for the whole script, except for the "echo off" command itself.
