Candidate Handbook 2020 - PTCNY

Your dialysis center will test your blood to make sure enough wastes are removed. The main test used to measure your dialysis dose is called Kt/V (pronounced 'kay tee over vee'). Another test used by some centers is called urea reduction ration (URR). For hemodialysis patients, Kt/V should be at least 1.2 and URR should be at least 65 percent.

Coping Effectively: A Guide for Patients and their ...

Dialysis is a procedure to remove waste products and excess fluid from the blood when the kidneys stop working properly. It often involves diverting blood to a machine to be cleaned. Normally, the kidneys filter the blood, removing harmful waste products and excess fluid and turning these into urine to be passed out of the body.
