Ecological  
Relationships **Natural**  
**Controls Of**  
**Populations Lab**

Some of the controls

# Where To Download

acting on populations  
are: ? the amount of  
food and water  
available to feed the  
population ? the  
amount of nesting  
sites available to  
support raising young  
? the size of the  
predator population ?  
the amount of disease  
and parasites  
infecting the  
population Because of

# Where To Download

these limitations a certain area can only support a certain size population of each type of organism.

Artificial Selection was used as an analogy for natural selection: If humans can breed animals (dogs, horses, crops) for certain traits (tiny size, speed, high yield), then it makes sense that in a natural environment, nature would “select for” the traits that allow organisms to survive

# Where To Download

and reproduce better.

## Populations Lab

### **Natural Selection (Darwin-Wallace) - Integrative Biology**

Yes, this lab will address the lesson question. The procedure shows two different food situations—three foods and two foods.

However, the initial

# Where To Download

populations of birds  
are the same.

Therefore, at the end,  
you can compare  
generation three for  
each food situation  
and measure the  
effect of the food  
change.

that affect population size: birth, death, immigration, and emigration.

# Where To Download

Immigration and emigration are usually very difficult to quantify in most natural populations, but because Isle Royale is isolated, these factors can basically be ignored, making this an especially practical place to study population ecology.
