Organic Farming | National Portal of India

The great Indian civilization thrived on organic farming; India was one of the most prosperous countries in the world until the British invaded and ruled it. In traditional India, the entire industry of agriculture was practiced using organic techniques, where the fertilizers and pesticides were obtained from plant and animal products. Organic farming was the backbone of the Indian economy and cows were worshiped (as is still done) as sacred animals from God.

Organic Farming in India | Organic Facts

India holds a unique position among 172 countries practicing organic agriculture: it has 6,50,000 organic producers, 699 processors, 699 exporters and 7,20,000 hectares under cultivation. But, with merely 0.4 percent of total agricultural land under organic cultivation, the industry has a long journey ahead.
