Triptan medicines are a specific painkiller for migraine headaches. They're thought to work by reversing the changes in the brain that may cause migraine headaches. They cause the blood vessels around the brain to narrow (contract). This reverses the widening of blood vessels that's believed to be part of the migraine process.

Migraine - Treatment - NHS

You should see a GP if you have frequent or severe migraine symptoms. Simple painkillers, such as paracetamol or ibuprofen, can be effective for migraine. Try not to use the maximum dosage of painkillers on a regular or frequent basis as this could make it harder to treat headaches over time.

Migraine - NHS
