Sensing And
"Pervasive sensing is
simply the use of sensors
to capture data on
anything in a plant that
could affect its operation.
It is driven to a large
extent by the increasing
availability of inexpensive
sensors -- many of them
wireless. Pervasive
sensing comes down to
use of multiple sensors
everywhere, often (but

Pervasive And
not always) wireless."

~~Pervasive sensing: How it
affects enterprise and IoT
security~~

Your automation systems
and sensors provide real-
time control, but
important plant data is
often not collected due to
the high cost, disruptions
and time required to add
wired sensors and
analyze the data.
