## Su 8 50 100

SU-8 3000 has been formulated for improved adhesion and reduced coating stress. It is being used where high bond strength and improved flexibility for microstructure fabrication is desired. As a result, adhesion to the substrate is greatly improved.

When SU-8 is exposed to UV light its molecular chains cross-link, causing the SU-8 to solidify. SU-8 is highly transparent in the ultraviolet range. This allows for the fabrication of relatively thick (hundreds of micrometers) structures with nearly vertical side walls.

File Type PDF
