~~The Elements of Murder Summary — eNotes.com~~

Emsley offers here a fascinating account of five of the most toxic elements--arsenic, antimony, lead, mercury, and thallium--describing their lethal chemical properties and highlighting their use in some of the most famous murder cases in history.

~~The Elements of Murder — John Emsley — Oxford University Press~~

The willfulness element of first-degree murder speaks to the intent of the actor. A defendant is willfully committing first-degree murder when they act intentionally of their own free will and not by accident. This means there can be no one forcing or coercing you into killing another and it has to be the sole choice of the actor.

~~Definition and Elements of Murder in the First Degree~~

Actus Reus, Mens Rea and no defence are the main elements of a crime (murder). Actus Reus (is the guilty Act) has three common elements, which are causing an unlawful death of a human being. The act or omission of the defendant must have been the legal cause of the death of the victim. "But for" Peeta actions the defendant has died.
