Download

Ebook Tumors

An acoustic neuroma is not cancer (malignant). It is a benign tumour. A benign tumour can cause problems as it grows by pressing on surrounding tissue. But, unlike cancer, it cannot spread from where it started to other parts of the brain.

Download

Ebook Tumors

Acoustic neuromas

develops from the lining of the main nerve that

connects the inner ear to your brain.

This is called the acoustic or

vestibulocochlear nerve and it

controls your hearing and

balance.
